

**FOR SMOOTH DEDUSTING OF MIXING PROCESSES AND
CONVENIENT DUST RECYCLING.**

**Filter materials with
extra long durability**

**Made possible
through outstanding
construction design**

**Easy integration into
existing systems**

The MIXFI is a mixing filter used for direct dedusting of mixed charges.

Areas of Application

- Smooth dust recycling of filter dusts to the mixer
- Direct installation on top of an exhaust air chute or
- Dust collection box design with aspiration port on the side through which the mixing filter can be installed directly next to the mixer and dedust it through a flexible tube.
- Special dedusting system with vacuum flaps respectively leak air at the mixer cleanout.
- Variable 2/2 way solenoid valve and ventilator voltage in AC or DC.
- Clocked relay for cleaning the filter cartridges (optional).

- Filter body made out of steel ST 32-2, lacquered, hammer tone silver gray respectively stainless steel.

Various voltages and explosion proof versions of ventilator and solenoid valve coils are available!

Notice

Additional sizes and options (e.g. pressure surge protected version) can be tailored to your special application!

Notice

When placing an order please define the materials which are mixed in your silo system (e.g. cement, lime etc...)

Accessories for Mixfi

Dedusting control for top hat rail installation	Article number
For dedusting of the mixing filter during the mixer cleanout. Control board for on site installation into the control box. Blow time set up, break time adjustable through potentiometer (2 – 15 s). Voltage 230 V AC	881 10 062
Alternative: Mounted to the plastic box on the filter and completely wired. Control process see above. Voltage 230 V AC	881 10 063

Additional Accessories for Mixfi

Adapterflange: To flange on the mixing filter. Hose barb specification St 37, rust removal SA 1. Grounding and top coat hammer stroke grey.	Mixfi 10,5	Mixfi 15 / 18		Mixfi 21
